TECHNICAL SKILLS

Languages: Python, JavaScript
Database: MySQL
Web Technologies: HTML, CSS
Frameworks: Django (Basics)
Tools: GitHub, VS Code, Cursor

PROJECTS

Driver Drowsiness Detection System | Python, OpenCV, Facial Landmark Detection | [Link](#)

- Developed a real-time driver monitoring system using facial landmark analysis to detect eye closure, blink rate, and head tilt as indicators of fatigue.
- Implemented audio, visual, and haptic alert mechanisms to warn drivers of detected fatigue.
- Applied computer vision techniques with OpenCV and facial landmark detection for continuous monitoring.
- Demonstrated performance across varied lighting conditions and its potential use in advanced driver-assistance systems (ADAS).

Air Quality Interpolation and Prediction | Python, HTML, CSS (Basic) | [Link](#)

- Performed air-quality interpolation using sparse sensor data to create high-resolution pollution mapping.
- Built deep-learning-based time-series forecasting for future pollutant levels.
- Processed PM2.5 and PM10 sensor data and provided air-quality monitoring and visualization.
- Developed an interactive dashboard displaying live air-quality data, predictions, and pollution trends.

EDUCATION QUALIFICATION

Bachelor of Engineering, Artificial Intelligence and Machine Learning	8.12
East West Institute of Technology (VTU University)	2026
PUC	8.53
SDM Residential PU College, Ujire	2022
SSLC	8.05
MDRS Kuppalu	2020

TECHNICAL EXPERTISE

- Python Core: OOP, exception handling, functions, modules, and key data structures.
- Problem-solving and logical thinking with focus on clean, efficient code.
- SQL: joins, subqueries, aggregate functions, database management, and normalization in MySQL.

INTERNSHIP

Python Full Stack Development Intern — Dhee Coding Lab

Completed a Python Full Stack Development internship with hands-on experience in Python, Django, MySQL, HTML, CSS, and JavaScript, focusing on backend development, database integration, responsive UI development, debugging, and building web applications.

Gained practical experience in developing application features, writing SQL queries, integrating frontend and backend components, and troubleshooting software issues. Strengthened problem-solving, analytical, and software development skills through project-based learning.

CERTIFICATIONS & ACHIEVEMENTS

- Published the project “Driver Drowsiness Detection System” in IJPREMS and received an official publication certificate.
- Completed Python Full Stack Development with GenAI training at Dhee Coding Lab.
- Certifications/coursework: HTML, CSS; Data Science in Python.

INTERPERSONAL SKILLS

- Team coordination, communication, leadership, and responsibility through college projects.
- Discipline, patience, and teamwork developed through long-term engagement in cricket.
- Adaptable and quick to learn new technologies, with a positive attitude toward teamwork and continuous improvement.
